What is the vision, dream you value and hold as a campus, regarding your offering and approaches to teaching and learning?

Innovation:

How are we going to collaboratively design and embed teaching and learning practices to ensure your campus is leading the way in relevant and authentic learning experiences?

Transactional Learning

Transformational Learning

- Involves the exchange of ideas and information between teachers and students where **the focus is knowledge transmission and acquisition**, which has traditionally been the primary goal of learning.
- The role of the impact of technology can be finite because transactional approaches have limited outcomes

- Fosters student's capacities for communication, collaboration, critical thinking, creativity, cognitive flexibility, complex problem solving and curiosity, often at the same time students are acquiring basic knowledge.
- **Students need to apply knowledge and skills, not just possess these.**
